INDEX TO VOLUME V

Authors

Aamodt, O. S.—Varietal trials, physiologic specialization, and breeding spring wheats for resistance to Tilletia tritici and T. levis, 501.
Alsberg, C. L.—See Cook, W. H.
Anderson, J. A.—See Newton, R.
Barsha, J.—See Hibbert, H.
Bateson, S.—The range of the alpha-particles from uranium II, 567.
Biely, J.—The constancy of repeated agglutination tests in the diagnosis of pullorum disease, 693.
Boyle, R. W. and Sproule, D. O.—Velocity of longitudinal vibration in solid rods (ultrasonic method) with special reference to the elasticity of ice, 601.
Brockington, S. F.—See Larmour, R. K.
Brown, W. R.—See Newton, R.
Burton, A. C.—See McLennan, J. C.
Coffin, C. C.—Studies on homogeneous first order gas reactions. I. The decomposition of ethylidene diacetate, 636.
Cook, W. H.—Preparation and heat denaturation of the gluten proteins, 389.
Cook, W. H. and Alsberg, C. L.—Preparation of glutenin in urea solutions, 355.
Dowding, E. S.—Wallrothiella arceuthobii, a parasite of the jack-pine mistletoe, 219.
Elton, C.—Epidemics among sledge dogs in the Canadian Arctic and their relation to disease in the arctic fox, 673.
Farrell, L. and Lochhead, A. G.—Accessory food substances for osmophilic yeasts. II. Comparison of honey bioactivator with Bios, 539.
Farrell, L.—See Lochhead, A. G.
Field, G. S.—Longitudinal and radial vibrations in liquids contained in cylindrical tubes, 132.
Velocity of sound in cylindrical rods, 619.
Hallonquist, E.—See Hibbert, H.
Harrington, J. B.—The effect of temperature on the expression of factors governing rust reaction in a cross between two varieties of Triticum vulgare, 200.
The relationship between endosperm development and morphologic characters in the F_2 generation of a T. dicoccum × T. vulgare cross, 208.
Hatcher, W. H., Steacie, E. W. R. and Howland, F.—The oxidation of acetaldehyde, 648.
Henderson, G. H.—A simple apparatus for purifying radon, 466.
Henry, A. W.—Occurrence and sporulation of Helminthosporium sativum P.K.B. in the soil, 407.
Hibbert, H. and Barsha, J.—Studies on reactions relating to carbohydrates and polysaccharides. XXXIX. Structure of the cellulose synthesized by the action of Acetobacter xylinus on glucose, 580.
Hibbert, H. and Hallonquist, E.—Studies on reactions relating to carbohydrates and polysaccharides. XXXVIII. Preparation, separation and identification of the isomeric bromoethylidene glycerols, 428.
Hibbert, H. and Marion, L.—Studies on lignin and related compounds. IX. Ethers of glycol-lignin, 302.
Hibbert, H.—See Sankey, C. A. and Tarr, H. L. A.
Howland, F.—See Hatcher, W. H.
Howlett, L. E.—Raman effect of benzene and toluene under high dispersion and resolving power, 572.
Hutchinson, A. H. and Lucas, C. C.—The epithalassa of the Strait of Georgia; salinity, temperature, pH and phytoplankton, 231.
Ireton, H. J. C.—See McLennan, J. C.
Isa, J. M.—See Savage, A.
Kirk, L. E. and Stevenson, T. M.—Factors which influence spontaneous self-fertilization in sweet clover (Melilotus), 313.
Spontaneous self-fertilization in relation to seed production in sweet clover (Melilotus), 660.
Larmour, R. K. and Brockington, S. F.—Comparison of composites and averages with respect to baking quality. I. Pure samples of one variety, 491.
Lochhead, A. G. and Farrell, L.—Accessory food substances for osmophilic yeasts. I. A bioactivator in honey stimulating fermentation, 529.
The types of osmophilic yeasts found in normal honey and their relation to fermentation, 665.

Lochhead, A. G.—See Farrell, L.

Lucas, C. C.—See Hutchinson, A. H.

Maass, O.—See Morehouse, F. R., Morgan, O. M., Russell, J., Sutherland, H. S. and Wright, R. H.

McLennan, J. C. and Burton, A. C.—Selective heating by short radio waves and its application to electrotherapy, 550.

McLennan, J. C. and Patrick, W. L.—The action of high-speed cathode rays on the simpler alcohols, aldehydes and ketones, and on ethylene, 470.

McLennan, J. C., Wynne-Edwards, H. S. and Ireton, H. J. C.—Height of the polar aurora in Canada, 285.

Manske, R. H. F.—The alkaloids of Senecio species. I. The necines and necic acids from S. retrorsus and S. jacobaea, 651.
A synthesis of the methyltryptamines and some derivatives, 592.

Marion, L.—See Hibbert, H.

Morehouse, F. R. and Maass, O.—The preparation and physical properties of ethyl and methyl acetylene, 306.

Morgan, O. M. and Maass, O.—An investigation of the equilibria existing in gas-water systems forming electrolytes, 162.

Newton, R. and Anderson, J. A.—Respiration of winter wheat plants at low temperatures, 337.

Newton, R. and Brown, W. R.—Catalase activity of wheat leaf juice in relation to frost resistance, 332.
Frost precipitation of proteins of plant juice, 87.

Newton, R., Brown, W. R. and Anderson, J. A.—Chemical changes in nitrogen fractions of plant juice on exposure to frost, 327.

Niven, C. D.—The problem of the electrical conductivity of metals, 79.

Patrick, W. L.—See McLennan, J. C.

Reed, G. B. and Rice, C. E.—Studies in the variability of tubercle bacilli. II. Correlation of colony structure, acid agglutination and virulence, 111.

Reed, G. B.—See Rice, C. E.

Reeve, H. A.—See Steacie, E. W. R.

Rice, C. E.—Studies in the variability of tubercle bacilli. IV. Antigenic properties of S and R cultures, 375.

Rice, C. E. and Reed, G. B.—Studies in the variability of tubercle bacilli. III. Influence of X-rays upon dissociation, 122.

Rice, C. E.—See Reed, G. B.

Rose, D. C.—Humidity measurements in the slip stream of flying aircraft, 482.
Resistance thermometers for the measurement of relative humidity or small temperature differences, 156.
The use of artificial illumination for grading grain, 64.

Ruedy, R.—On the propagation of longitudinal waves in cylindrical rods, 149.
On the sound field in the neighborhood of an oscillating plane disk, 297.

Russell, J. and Maass, O.—Two-component systems involving compound formation, 436.

Sankey, C. A. and Hibbert, H.—Studies on lignin and related compounds. VIII. A kinetic study of the action of sulphurous acid on lignin and related compounds, 1.

Savage, A. and Isa, J. M.—The use of the projection microscope and photo-electric cell. II. Blood studies, 544.

Sproule, D. O.—See Boyle, R. W.

Steacie, E. W. R. and Reeve, H. A.—A modified flow method for measuring the velocities of gas reactions, 448.

Steacie, E. W. R.—See Hatcher, W. H.

Stedman, D. F.—Economy of time in laboratory distillation, 455.

Stevenson, T. M.—See Kirk, L. E.

Sutherland, H. S. and Maass, O.—The discontinuity in the velocity coefficient of a chemical reaction at the critical temperature, 48.

Tarr, H. L. A. and Hibbert, H.—Studies on reactions relating to carbohydrates and polysaccharides. XXXVII. The formation of dextran by Leuconostoc mesenterioides, 414.

Wright, R. H. and Maass, O.—The vapor density of hydrogen sulphide, 422.

Wynne-Edwards, H. S.—See McLennan, J. C.

INDEX TO VOLUME V

Subjects

Abies
grandis, 220.
lasiocarpa, 220.

Accessory food substances for osmophilic yeasts.
I. A bioactivator in honey stimulating fermentation, (Lochhead and Farrell), 529.
II. Comparison of honey bioactivator with Bios, (Farrell and Lochhead), 539.

Acetaldehyde and acetone by high-speed cathode rays, Gaseous mixtures formed during decompositions of, 474.
Oxidation of, (Hatcher, Steacie and Howland), 648.

Acetals, Isomeric alkylidene glycerol, 429.

Acetobacter xylinus on glucose, Structure of the cellulose synthesized by the action of, 580.

Acetolysis of cellulose formed from glucose by action of Acetobacter xylinus, 590.

Acetone and acetaldehyde by high-speed cathode rays, Gaseous mixtures formed during decompositions of, 474.

Acetylenes, Physical properties of, 311.
Preparation and physical properties of ethyl and methyl, (Morehouse and Maass), 306.

Acids
Effect on frost precipitation of proteins of plant juice, 102.
from carbon compounds by action of Leuconostoc mesenterioides, Production of, 420.
Jaconecic, 659.
Lignosulphonic, 1.
Necic, 651.
Sulphurous,
Action on
aldehydes, 5.
compounds containing cyclic carbonyl groups, 11.
ketones, 8.
furane derivatives, 16.

Aconitum, 651.

Adsorption of honey bioactivator by charcoal, 536.

Aerodynamics of ion tube used for measurement from flying aircraft of the ionization of the atmosphere, 628.

Aeroplanes
Humidity measurements in the slip stream of, 482.
Measurement of ionization of atmosphere from, 625.

Agglutination tests
in the diagnosis of pullorum disease, The constancy of repeated, (Biely), 693.
Technique of, 695.

Aircraft, Humidity measurements in the slip stream of flying, (Rose), 482.
The ionization of the atmosphere measured from flying, (Rose), 625.

Alberta soils
Occurrence of Helminthosporium sativum in, 408.
Sporulation of artificial cultures of H. sativum in, 411.

Albotrea sweet clover, 317.

Alcohol mixture through nearly infinite column, Distillation of, 459.

Alcohols, aldehydes, ketones and on ethylene, Action of high-speed cathode rays on the simpler, (McLennan and Patrick), 470.

Aldehydes,
Action of sulphurous acid on nuclear, 5.
and ketones and on ethylene, Action of high-speed cathode rays on the simpler alcohols, (McLennan and Patrick), 470.
Oxidation of acetaldehyde, (Hatcher, Steacie and Howland), 648.
Yield and proportion of isomeric alkylidene glycerol acetals formed from various aliphatic, 429.

Alkaloids
Calycanthine, 592.
of Senecio species, (Manske), 651.

Alkyl acetylenes
Apparatus used in preparation of, 307.
Preparation and physical properties of, 306.

Alkylidene glycerol acetals, 429.

Alopex lagopus, 681.

Alpha-particles from uranium II, The range of the, (Bateson), 567.

Amide and arginine nitrogen contents of glutenin, 370.

Amino nitrogen content of plant juice, Effect of frost on, 327.

γ-Aminobutyracetal, Diethyl, 599.

Ammonia solutions
Equilibria existing in aqueous, 188.
Partial vapor pressures of, 188.
Specific conductivity of, 189.

Ammonia nitrogen content of plant juice, Effect of frost on, 327.

Anemia, Examination by combined photo-electric cell and projection microscope of blood cells from a case of,
primary, 548.
secondary, 547.

Antibodies constituting S and R antisera, Suggestions as to type of, 386.

Antigen in agglutination tests for pullorum disease, 695.
Tubercular, 377.

Antigenic properties of S and R cultures, (Rice), 375.

Antisera, Suggestions as to type of antibodies constituting S and R, 386.

Apparatus for purifying radon, Simple, (Henderson), 466.

Apparent molecular weights at various pressures and temperatures,
ethyl alcohol, 438.
ethyl ether, 436.
hydrogen sulphide, 444.
methyl alcohol, 437.

Arceuthobium
americanum, 219.
douglasii, 220.
pusillum, 220.
tsugensis, 220.

Arceuthobium in Canada, Distribution of, 221.

Arginine nitrogen content of glutenin, 370.

Artificial illumination for grading grain,
Use of, (Rose), 64.
Photo-electric cell, 73.

Ascococcus mesenterioides, 414.

Atmosphere measured from flying aircraft, Ionization of, (Rose), 625.

Aurora borealis, 285.
in Canada, Height of the polar, (McLennan, Wynne-Edwards and Ireton), 285.

Australian flour, Comparison of some composites and average loaf volumes, 492.

Bacilli, Tubercle, 111, 122, 375.

Bacterium
aceti, 581.
anthracis, 122.
xylinum, 581.

Baking quality, Comparison of composites and averages with respect to,
I. Pure samples of one variety, (Larmour and Brockington), 491.

Bases, effect on frost precipitation of proteins of plant juice, 102.

Beckmann-Liesche-Lehmann lignin, Specific conductivity of lignosulphonic acid from, 23.

Benzaldehyde, Action of sulphurous acid on, 5, 28.

Benzene, Action of sulphurous acid on tetrahydro-, 14.

Benzene and toluene, Comparison of Raman frequencies of, 575.
Raman spectrograms of, 574.
under high dispersion and resolving power, Raman effect of, (Howlett), 572.
Visual estimates of the intensity distribution in the hydrogen vibrations of, 577.

Benzoates of bromoethylidene glycerol, Preparation of, 432.

Benzoyl-retronecine, 656.
hydrochloride, 656.
methochloride, 657.

Benzylidene acetone, Action of sulphurous acid on, 9, 31.

Bioactivator with Bios, Comparison of honey, (Farrell and Lochhead), 539.

Bioactivator in honey
Adsorption by charcoal of, 536.
Characteristics of, 534.
Fractionation of, 536.
stimulating fermentation, A, (Lochhead and Farrell), 529.
with Bios, Comparison of, (Farrell and Lochhead), 539.

Bios
Comparison of honey bioactivator with, (Farrell and Lochhead), 539.
Effect upon
Saccharomyces cerevisiae, 541.
Zygosaccharomyces mellis, 542.

Black Orpingtons, Agglutination tests in the diagnosis of pullorum disease in, 701.

Bozosio wheat, Bunt infection in, 513, 514, 516.

Barred Plymouth Rocks, Agglutination tests in the diagnosis of pullorum disease in, 701.

Breeding of wheat
for stem rust resistance, 504.
resistant to bunt, 517.

Bromoacetaldehyde (bromoparaldehyde), Preparation of, 431.

Bromoethylidene glycerol, 432.
benzoates, 432.

1:2-Bromoethylidene glycerol, Methylation of, 434.

1:2-Bromoethylidene glycerol 3-benzoate, Hydrolysis of, 433.

1:2-Bromoethylidene glycerol 3-methyl ether, Synthesis of, 434.

1:3-Bromoethylidene glycerol, Methylation of, 434.

1:3-Bromoethylidene glycerol 2-benzoate, Hydrolysis of, 433.

1:3-Bromoethylidene glycerol 2-methyl ether, Synthesis of, 434.

Bromoethylidene glycerols
and derivatives, Properties of the, 431.
Preparation, separation and identification of the isomeric, (Hibbert and Hallonquist), 428.

Buffum wheat, Frost precipitation of proteins in, 102.

Bunt
Breeding wheats resistant to, 517.
in wheat
in field tests, 508.
inoculated artificially, 514.
percentages in Marquis check plots, 506.
Resistance of winter wheats to, 502.

Calycanthine, 592.

Carbohydrates and polysaccharides,
Studies on reactions relating to,
XXXVII. The formation of dextran by Leuconostoc mesenterioides, (Tarr and Hibbert), 414.
XXXVIII. Preparation, separation and identification of the isomeric bromoethylidene glycerols, (Hibbert and Hallonquist), 428.
XXXIX. Structure of the cellulose synthesized by the action of Acetobacter xylinus on glucose, (Hibbert and Barsha), 580.

Carbolines, 596.

Carbon dioxide solutions
Equilibria existing in aqueous solutions of, 181.
Henry's law constants for, 186.
Partial vapor pressures of, 182.
Specific conductivity of, 183.

Carbonic acid, Dissociation constants of, 187.
Specific conductivity at 18°C., 187.

Catalase activity of wheat leaf juice in relation to frost resistance, (Newton and Brown), 333.

Catalysts
Sulphuric acid, 585.
Sulphuryl chloride, 584.

Cathode rays on the simpler alcohols, aldehydes and ketones, and on ethylene, Action of high-speed, (McLennan and Patrick), 470.
acetaldehyde, 474, 475.
acetone, 474.
ethyl alcohol, 476, 477.
ethylene, 477.
formaldehyde, 473.
methyl alcohol, 476, 477.

Cellulose synthesized by action of Acetobacter xylinus on glucose.
acetate, Preparation of acetone-soluble, 586.
Acetolysis of, 590.
Comparison of cotton cellulose with, 583.
Constitution of, 582.
from acetate, Regeneration of, 585.
Structure of the, 580.
triacetate with methyl alcohol, Hydrolysis of, 586.
with zinc chloride-hydrochloric acid, Hydrolysis of, 587.
X-ray examination of, 586.

Cères wheat, Bunt infection of, 508.

Charcoal, Adsorption of honey bioactivator by, 536.

Chemical changes in nitrogen fractions of plant juice on exposure to frost, (Newton, Brown and Anderson), 327.

Chicks, Pullorum disease in, 694.

Chlorinity of the Strait of Georgia, 231.

Cinchonoideae, 651.

Cinnamyl alcohol, Action of sulphurous acid on, 14, 35.

Cladosporium herbarum, 226.

Comparison of composites and averages with respect to baking quality,
I. Pure samples of one variety, (Larmour and Brockington), 491.

Compositae, 651.

Composites and averages with respect to baking quality, Comparison of, 491.

Conduction, The process of electrical, 82.

Conductivity of the atmosphere, 625.
of metals, Problem of the electrical, (Niven), 79.
of systems containing sulphurous acid, Specific, 7.

Cotton cellulose with synthetic cellulose obtained by the action of Acetobacter xylinus on glucose, Comparison of the properties of, 583.

Critical peptization temperature and viscosity of gliadin preparations, 394.

Critical reflux ratio, 455.

Critical temperature, Discontinuity in the velocity coefficient of a chemical reaction at the, (Sutherland and Maass), 48.

Crotonaldehyde, Action of sulphurous acid on, 26.

β-Cyanopropionacetal, Diethyl, 598.

Cyclohexanone, Action of sulphurous acid on, 12, 33.

Cylindrical rods, Propagation of longitudinal waves in, (Ruedy), 149.

Cylindrical tubes
Boundary conditions at wall of, 132.
Longitudinal and radial vibrations in liquids contained in, (Field), 131.
Resonant frequencies of radial vibration in liquid in, 134.
Transmission of sound in liquids contained in, 138.

Denaturation by urea solutions, Possible, 371.
of gluten dispersions, Heat, 397.
Protein, 355.

Density of
ethyl acetylene, 310.
methyl acetylene, 310.
mixture of propylene and hydrogen chloride, 58.

Devarda method, Effect of hydrolysis in determinations of ammonia- and of nitrate-nitrite-nitrogen by the, 330.

Dextran by Leuconostoc mesenterioides, Formation of, (Tarr and Hibbert), 414.
Optimum conditions, 421.

Dextrose medium, Effect of concentration of honey solution on fermentation of synthetic, 531.
Effect on frost precipitation of proteins of plant juice, 87.

Dibenzyl ketone, Action of sulphurous acid on, 11, 32.

Dibenzoyl methane, Action of sulphurous acid on, 11, 33.

Dicklow wheat, Bunt infection of, 508.

Diethyl γ-aminobutyracetal, 599.

Diethyl β-cyanopropionacetal, 598.

2:2-Dimethyl-3-benzoyl-2:3:4:5-tetrahydro-3-carboline, 596.

N,N-Dimethyltryptamine, 595.
picrate, 595.

Dinitrophenyl ether of glycol-lignin,
Methylation, 304.
Preparation, 304.

Disk, Pressure amplitudes in the sound field of a vibrating solid, 299.
Sound field in the neighborhood of an oscillating plane, (Ruedy), 297.

Dispersion and resolving power, Raman effect of benzene and toluene under high, (Howlett), 572.

Dissociation of R colonies to S,
Effect of protective colloids on, 127.
Influence of X-rays on, 123, 126.
Stability of R colonies in, 125.

Distillation, Economy of time in laboratory, (Stedman), 455.
of alcohol mixture through a nearly infinite column, 459.
of ethyl alcohol plus 10% by weight of methyl alcohol, 458.

Dogs, Epidemics among sledge, 674.

Double crosses of wheat, Bunt infection in, 521.

Drosophila, 122.

Durum wheat, Comparison of some composites and average loaf volumes, 492.

Early Triumph wheat, Bunt infection of, 508.

Economy of time in laboratory distillation, (Stedman), 455.

Eggs heated by short radio waves, Rise in temperature of, 563.

Elasticity of ice, 613.

Electric field in body, 556.

Electric fields to medicine, Application of high frequency, 550.

Electrical conductivity of metals, Problem of the, (Niven), 79.

Electrodialysis,
Specific conductivity of electrodialyzed sulphite liquors, 42.

Electrotherapy, Selective heating by short radio waves and its application to, (McLennan and Burton), 550.

Electrolytes, Equilibria existing in gas-water systems forming, (Morgan and Maass), 162.

Electrometer used in measuring ionization of atmosphere from flying aircraft, Fibre, 629.

Emmer wheat, Bunt infection of, 513, 514.

Encephalitis in foxes, 673.

Endosperm development and morphologic characters in the F_2 generation of a T. dicoccum × T. vulgare cross, Relationship between, (Harrington), 208.

English flour, Comparison of some composites and average loaf volumes, 492.

Epidemics among sledge dogs in the Canadian Arctic and their relation to disease in the arctic fox, (Elton), 673.

Epithalassa of the Strait of Georgia; salinity, temperature, pH and phytoplankton, (Hutchinson and Lucas), 231.

Equilibria in gas-water systems forming electrolytes, (Morgan and Maass), 162.
Apparatus for investigating, 169.

Es. coli, 128.

Ether- and ethyl alcohol-hydrogen chloride systems, 436.

Ethers of glycol-lignin, (Hibbert and Marion), 302.

Ethyl acetylene, Apparatus for preparation of, 307.
Preparation and physical properties of, (Morehouse and Maass), 306.

Ethyl alcohol, Action of high-speed cathode rays on, 470.
at various pressures and temperatures, Apparent molecular weight of, 438.
-hydrogen chloride system at various temperatures, Logarithms of the mass law constants for, 441.
plus methyl alcohol, Distillation of, 458.

Ethyl ether at various pressures and temperatures, Apparent molecular weight of, 436.

Ethylene, Action of high-speed cathode rays on simpler alcohols, aldehydes and ketones and on, (McLennan and Patrick), 470.

Ethylidene diacetate
Decomposition of, (Coffin), 636.
Energy of activation of, 645.
Homogeneity of reaction, 644.
Products of reaction, 640.

Fermentation, A bioactivator in honey stimulating, (Lochhead and Farrell), 529.
Types of osmophilic yeasts found in normal honey and their relation to, (Lochhead and Farrell), 665.

Fertilization in sweet clover (Melilotus)
Factors which influence spontaneous self-, (Kirk and Stevenson), 313.
in relation to seed production, Spontaneous self-, (Kirk and Stevenson), 660.

Flour, Comparison of some composites and loaf volumes, 492.
on amount of gliadin extracted by alcohol and the C.P.T. of extract, Effect of heat-treating, 404.

Flow method for measuring the velocities of gas reactions, Modified, (Steacie and Reeve), 448.

Flower structure and self-fertilization, 661.

Food substances for osmophilic yeasts, Accessory,
I. A bioactivator in honey stimulating fermentation, (Lochhead and Farrell), 529.
II. Comparison of honey bioactivator with Bios, (Farrell and Lochhead), 539.

Formaldehyde by high speed cathode rays, Compositions of gaseous mixtures obtained from decomposition of, 474.

Fox, Epidemics among sledge dogs in the Canadian Arctic and their relation to disease in the arctic, (Elton), 673.

Fractionation of gluten, 394.

Fractional distillation of ideal mixtures, 455.

Frost, Chemical changes in nitrogen fractions of plant juice on exposure to, (Newton, Brown and Anderson), 327.

Frost precipitation of proteins of plant juice, (Newton and Brown), 87.
Effect of acids, bases and salts on, 102.
Effect of sugar on, 95.

Frost resistance, Catalase activity of wheat leaf juice in relation to, (Newton and Brown), 333.

Fructose, Production of dextran from, 426.

Fulcaster wheat at low temperatures, Respiration of, 340, 346, 349.
Catalase activity of press-juice of leaves of, 334.
Changes in nitrogen distribution of press-juice on freezing, 329.
Frost precipitation of proteins in, 90, 91.

Furane derivatives, Action of sulphurous acid on, 16.

Furfural, Action of sulphurous acid on, 16, 36.

Furfuryl alcohol, Action of sulphurous acid on, 17, 37.

Galactose, Production of dextran from, 426.

Garnet wheat, Bunt infection of, 508, 514.
samples, Comparison of composites and averages of, 495.

Gas reactions, Modified flow method for measuring the velocities of, (Steacie and Reeve), 448.
Studies on homogeneous first order.
I. The decomposition of ethylidene diacetate, (Coffin), 636.
Energy of activation, 645.
Homogeneity of reaction, 644.
Products of the reaction, 640.

Gas-water systems forming electrolytes, Equilibria in, (Morgan and Maass), 162.

Giant Ragwart, 651.

Gliadin
after heating at 70°C., Decrease in viscosity of, 403.
dispersions in 30% urea solutions, Effect of heat treatment on the viscosity of 4%, 402.
extracted by alcohol, Effect of heat-treating flour on the amount of, 404.
from 30% urea solutions, Magnesium sulphate as precipitant of, 362.
Heat denaturation of, 400.
of normal moisture content on its subsequent C.P.T. and viscosity in 60% alcohol, Effect of heat-treating, 401.
Preparation and properties of, 392.
preparations, Critical peptization temperature and viscosity of, 394.
preparations, Nitrogen content and distribution of, 393.

Glucal, Action of sulphurous acid on, 19, 38.

Glucose, Action of sulphurous acid on, 7, 30.
Production of dextran from, 426.
Structure of the cellulose synthesized by the action of Acetobacter xylinus on, (Hibbert and Barsha), 580.

Gluten
after heating at 70°C., Decrease in viscosity of, 403.
at different salt concentrations, Composition of fractions precipitated from a 30% urea dispersion of, 396.
Concentration of magnesium sulphate required to precipitate glutenin from urea dispersions of, 361.
dispersion in urea-buffer solutions. Effect on viscosity of
heat treatment, 399.
hydrogen ion concentration, 398
time of storage, 398.
dispersions, Heat denaturation of, 397.
Fractionation of, 394.

Gluten proteins, Preparation and heat denaturation of the, (Cook), 389.

Glutenin
Amide and arginine nitrogen contents of, 370.
from 30% urea dispersions of gluten, Concentration of magnesium sulphate required to precipitate, 361.
in urea solutions, Preparation of, (Cook and Alsberg), 355.
preparations, Nitrogen content and distribution of, 369.

Glycerine solutions, Errors resulting from direct boiling, using platinum "boiling coil," 460.

Glycerol, Production of dextran from, 426.

Glycerols, Preparation, separation and identification of the isomeric bromoethylidene, (Hibbert and Hallonquist), 428.

Glycol-lignin, Dinitrophenyl ether of,
Methylation, 304.
Preparation, 304.
Ethers of, (Hibbert and Marion), 302.
Methoxymethyl ether of, 304.

Grain
Use of artificial illumination for grading, (Rose), 64.
Directions for inspectors, 71.
Variation in intensity of light of different colors reflected from various samples of, 74, 76.

Groundsel, Common (Senecio vulgaris), 652.

Hard Federation wheat, Bunt infection of, 508.

Heat denaturation of the gluten proteins, Preparation and, (Cook), 389.

Heating by short radio waves and its application to electrotherapy, Selective, (McLennan and Burton), 550.

Height of the polar aurora in Canada, (McLennan, Wynne-Edwards and Ireton), 285.

Helminthosporium sativum in Alberta soils, Sporulation of artificial cultures of, 411.
in the soil, Occurrence and sporulation of, (Henry), 407.
occurrence in Alberta soils, 408.
of small additions of unsterilized to sterilized soil, Effect on sporulation of, 412.

Henry's law constants for carbon dioxide, 186.

High frequency electric fields, Application to medicine of, 550.

Honey
and their relation to fermentation, Types of osmophilic yeasts found in normal, (Lochhead and Farrell), 665.
on a synthetic nutrient solution, Effect of, 530.
solution on fermentation of synthetic dextrose medium, Effect of concentration of, 531.
stimulating fermentation, A bioactivator in, (Lochhead and Farrell), 529.
Yeasts isolated from normal, 667.

Honey bioactivator
Effect upon
Saccharomyces cerevisiae, 541.
Zygosaccharomyces mellis, 542.
with Bios, Comparison of, (Farrell and Lochhead), 539.

Hope wheat, Bunt infection of, 514.

Humidity, Resistance thermometers for the measurement of relative, (Rose), 156.

Humidity measurements in the slip stream of flying aircraft, (Rose), 482.

Huron wheat, Bunt infection of, 508.

Hybrids
Effect of temperature on rust reaction of Marquis × Marquillo, 200.
Endosperm development and morphologic characters,
Vernal (T. dicoccum) × Marquis (T. vulgare), 208.
Resistance to bunt,
Double crosses, 519.
Marquis × Iumillo, 519.
Marquis × Kanred, 519.

Hydrogen chloride
and propylene
in gaseous phase, Reaction between, 57.
in liquid phase, Velocity of reaction of, 58.
Densities of a 2:1 mixture of, 58.
-propylene mixtures, Critical temperatures of, 58.

Hydrogen ion concentration for production of dextran by L. mesenterioides, Optimum, 421.
in frost precipitation of proteins of plant juice, 87.
of press-juice of field-grown plants at different ages, 99.
of the Strait of Georgia, 231.
on the viscosity of gluten dispersion in urea-buffer solutions, Effect of, 398.

Hydrogen sulphide at various temperatures and pressures, Apparent molecular weights of, 444.
Comparison of calculated and experimentally determined molecular weights of, 446.
Vapor density of, (Wright and Maass), 442.

Hydrogen vibrations, (Raman effect), Visual estimates of the intensity distribution in the,
benzene, 577.
toluene, 577.

Hydrolysis in determinations of ammonia- and of nitrate-nitrite-nitrogen by the Devarda method (plant-juice), Effect of, 330.
in zinc chloride-hydrochloric acid solution of cellulose formed by the action of A. xylinus on glucose, 587.
of 1:2-bromoethylidene glycerol 3-benzoate, 433.
of 1:3-bromoethylidene glycerol 2-benzoate, 433.
of Jacobine, 658.
of sulphonic acids with barium hydroxide, 17.

Hygrometer for measuring humidity in the slip stream of flying aircraft, Wet and dry bulb thermometer type of, 482.

Ice, Elasticity of, 613.
Velocity of longitudinal vibration in solid rods (ultrasonic method) with special reference to the elasticity of, (Boyle and Sproule), 601.
with temperature, Variation of Young's modulus for, 615.

Illumination for grading grain, Use of artificial, (Rose), 64.

Ion tube for ionization of air measured from flying aircraft, Aerodynamics of, 628.

Ionization of the atmosphere measured from flying aircraft, (Rose), 625.

Isomeric alkylidene glycerol acetals formed from various aliphatic aldehydes, Yield and proportion of, 429.

Isomeric bromoethylidene glycerols, Preparation, separation and identification of the, (Hibbert and Hallonquist), 428.

Iumillo × Marquis, 519.

Jacobine,
Hydrolysis of, 658.
methiodide, 658.

Jaconecic acid, Preparation of, 653.

Kanred wheat, Frost precipitation of proteins in, 99, 102.

Ketones and on ethylene, Action of high-speed cathode rays on the simpler alcohols, aldehydes and, (McLennan and Patrick), 470.
Action of sulphurous acid on, 8.

Khapli wheat, Effect of hydrolysis in determinations of ammonia- and nitrate-nitrite-nitrogen by the Devarda method, (plant-juice), 330.

Kitchener wheat, Bunt infection of, 508.

Kota wheat, Bunt infection of, 508, 514.

Lactococcus dextranicus, 416.

Lactones
Retronecic monolactone, 656.

Lactose, Production of dextran from, 426.

Lemmus lemmus, 685.

Leuconostoc
aller, 415.
citrovorus, 417.
opalanitza, 415.

Leuconostoc mesenterioides, Formation of dextran by, (Tarr and Hibbert), 414.
Polymerizing action of four strains of, 426.
Production of acid from carbon compounds by action of, 420.

Levulose, 531.

Light,
Artificial illumination for grading grain, 64.

Light Sussex pullets, Agglutination tests in the diagnosis of pullorum disease in, 701.

Lignin and related compounds, Studies on,
VIII. A kinetic study of the action of sulphurous acid on lignin and related compounds, (Sankey and Hibbert), 1.
IX. Ethers of glycol-lignin, (Hibbert and Marion), 302.

Lignosulphonic acids, 24, 42.

Liquids contained in cylindrical tubes, Longitudinal and radial vibrations in, (Field), 131.

Little Club wheat, Bunt infection of, 514.

Longitudinal and radial vibrations in liquids contained in cylindrical tubes, (Field), 131.
in solid rods, 602.

Longitudinal waves in cylindrical rods, Propagation of, (Ruedy), 149.

Loose smut of wheat (Ustilago tritici), 508.

Magnesium sulphate
as precipitant of gliadin from 30% urea solutions, 362.
required to precipitate glutenin from 30% urea dispersions of gluten, 361.

Magnetic field on resistance of metals, Effect of a, 84.

Maltose, Production of dextran from, 426.

Marquillo wheat, Bunt infection of, 508.

Marquillo × Marquis, 200.

Marquis wheat
at low temperatures, Respiration of, 349.
Bunt infection of, 508, 514.
check plots, Bunt percentages in, 506.
Comparison of composites and averages of pure strain samples grown in one locality, 494.
grouped on basis of
area of origin, 498.
protein, 495.
compared with Garnet and Reward, 497.
× emmer, Bunt infection of, 508.
× Iumillo, 519.
× Marquillo, 200.
× Vernal, 209.

Meat by short radio waves, Heating of, 561.

Medicine, Application of high frequency electric fields to, 550.

Melezitose, Production of dextran from, 426.

Melilotus
Factors which influence spontaneous self-fertilization in sweet clover, (Kirk and Stevenson), 313.
Flower structure and pollination in relation to seed setting, 317.
Spontaneous self-fertilization in relation to seed production in sweet clover, (Kirk and Stevenson), 660.

Melilotus alba and officinalis
Determining factors in spontaneous self-fertilization in, 660.
Flower structure and pollination in relation to seed setting in, 317.
Self-fertilization in, 313, 314, 316, 660.

Metals, Problem of the electrical conductivity of, (Niven), 79.

Methyl acetylene
Apparatus for preparation of, 307.
Physical properties of, 309, 311.
Preparation and physical properties of ethyl and, (Morehouse and Maass), 306.

Methyl alcohol, Action of high-speed cathode rays on, 476.
at various pressures and temperatures, Apparent molecular weight of, 437.
Hydrolysis of "cellulose" triacetate with, 586.

Methyl ethyl ketone, Action of sulphurous acid on, 8, 31.

1-Methyl-2-phenyl-3-carboline, 598.

1-Methyl-2-phenyl-4:5-dihydro-3-carboline, 597.

Methylation of
1:2 bromoethylidene glycerol, 434.
1:3 bromoethylidene glycerol, 434.
glycol-lignin dinitrophenyl ether, 304.

N-Methyltryptamine, 594.
Phenylcarbamyl derivative of, 595.
picrate, 595.

Methyltryptamines and some derivatives, Synthesis of the, (Manske), 592.

Micrococcus
gelatinogenes, 415.
gummosus, 415.

Minhardi wheat
at low temperatures, Respiration of, 340, 346, 349.
Catalase activity of press-juice of leaves of, 334.
Changes in nitrogen distribution of press-juice on freezing of, 329.
Frost precipitation of proteins in, 90, 91.

Mistletoe, Wallrothiella arceuthobii, a parasite of the jack-pine, (Dowding), 219.

Molecular compounds
ethyl ether-hydrogen chloride, 436.
methyl alcohol-hydrogen chloride, 436.

Molecular weights at various pressures and temperatures, Apparent,
ethyl alcohol, 438.
ethyl ether, 436.
hydrogen sulphide, 444.
methyl alcohol, 437.

Morphologic characters in the F_2 generation of a T. dicoccum × T. vulgare cross, Relation between endosperm development and, (Harrington), 208.

Mycob. leprae, 111, 384.
phlei, 111.
tuberculosis bovis, 123.

Necic acids, 652.

Necines, 652.

Nicotiana, 122.

Nitrate-nitrite-nitrogen by the Devarda method (plant-juice), Effect of hydrolysis in determinations of ammonia- and, 330.

Nitrogen content and distribution of
gliadin preparations, 393.
glutenin preparations, 369.

Nitrogen distribution of press-juice of plants on freezing, Changes in, 329.

Nitrogen fractions of plant juice on exposure to frost, Chemical changes in, (Newton, Brown and Anderson), 327.

Nostoc, 414.

Oscillating plane disk, Sound field in the neighborhood of an, (Ruedy), 297.

Osmophilic yeasts, Accessory food substances for,
I. A bioactivator in honey stimulating fermentation, (Lochhead and Farrell), 529.
II. Comparison of honey bioactivator with Bios, (Farrell and Lochhead), 539.

Oxidation of acetaldehyde, (Hatcher, Steacie and Howland), 648.

Pentad wheat, Bunt infection of, 514.

Peptization temperature of gliadin preparations, Viscosity and critical, 394.

Peptone for the formation of dextran from sucrose, Optimum concentration of, 423.

Peracid in oxidation of acetaldehyde, Apparent formation of, 648.

Phenols, Action of sulphurous acid on, 11.

Phloroglucinol, Action of sulphurous acid on, 14, 34.

Plant juice, Frost precipitation of proteins of, (Newton and Brown), 87.
Effect of
addition of acid, base and salt, 102.
age and condition of plants, 97.
length of exposure, 93.
sugar concentration, 95.
temperature, 89.
on exposure to frost, Chemical changes in nitrogen fractions of, (Newton, Brown and Anderson), 327.

Photo-electric cell
Use in grading grain, 73.
Use of the projection microscope and, II. Blood studies, (Savage and Isa), 544.

3-(β-Phthalimidoethyl)-1-methylindol, 597.

Physiologic specialization, and breeding spring wheats for resistance to Tilletia tritici and T. levis, Varietal trials, (Aamodt), 501.

Phytoplankton of the Strait of Georgia, 231.

Picea
engelmanni, 220.
mariana, 220.

Pinus banksiana, 219, 220.
mariana, 220.
murrayana, 220.

Plane disk, Sound field in the neighborhood of an oscillating, (Ruedy), 297.

Plankton of the Strait of Georgia, 231.

Plant juice, Frost precipitation of proteins of, (Newton and Brown), 87.
on exposure to frost, Chemical changes in nitrogen fractions of, (Newton, Brown and Anderson), 327.

Polar aurora in Canada, Height of the, (McLennan, Wynne-Edwards and Ireton), 285.

Pollination, Factors in selfed lines of M. alba as they affect, 662.
in relation to seed setting, Flower structure and, 317.

Polymerization, Action of four strains of L. mesenterioides, 426.

Polysaccharides, Studies on reactions relating to carbohydrates and,
XXXVII. The formation of dextran by Leuconostoc mesenterioides, (Tarr and Hibbert), 414.
XXXVIII. Preparation, separation and identification of the isomeric bromoethylidene glycerols, (Hibbert and Hallonquist), 428.
XXXIX. Structure of the cellulose synthesized by the action of Acetobacter xylinus on glucose, (Hibbert and Barsha), 580.

Potassium chloride for the formation of dextran from sucrose, Optimum concentration of, 424.
solutions by short radio waves, Heating of, 560.

Precipitation of proteins of plant juice, Frost, (Newton and Brown), 87.
Effect of
addition of acid, base and salt, 102.
age and condition of plants, 97.
length of exposure, 93.
sugar concentration, 95.
temperature, 89.

Press-juice of field-grown plants at different ages, Hydrogen ion concentration of, 99.
on freezing, Changes in nitrogen distribution of, 329.

Pressure amplitudes in the sound field of a vibrating solid disk, 299.

Preston wheat, Bunt infection of, 508, 514.

Problem of the electrical conductivity of metals, (Niven), 79.

Producer wheat, Bunt infection of, 508.

Progress wheat, Bunt infection of, 508, 514.

Projection microscope and photo-electric cell, The use of the, II. Blood studies, (Savage and Isa), 544.

Propagation of longitudinal waves in cylindrical rods, (Ruedy), 149.

Propylene and hydrogen chloride
Densities of a 1:2 mixture of, 58.
in gaseous phase, Reaction between, 57.
in liquid phase, Velocity of reaction of, 58.

Propylene-hydrogen chloride mixtures, Critical temperatures of, 58.

Protein, Comparison of composites and averages of flours based on,
Garnet, 495.
Marquis, 495.
Reward, 497.

Protein denaturation, 355.

Proteins of plant juice, Frost precipitation of, (Newton and Brown), 87.
Effect of
addition of acid, base and salt, 102.
age and condition of plants, 97.
length of exposure, 93.
sugar concentration, 95.
temperature, 89.
Preparation and heat denaturation of the gluten, (Cook), 389.

Pseudotsuga taxifolia, 220.

Puccinia coronata avenae, 200.
graminis tritici, 201.

Pullets, Agglutination tests in the diagnosis of pullorum disease in, 693.

Pyrone derivatives, Action of sulphurous acid on, 19.

Pullorum disease, The constancy of repeated agglutination tests in the diagnosis of, (Biely), 693.

Quercetin, Action of sulphurous acid on, 22, 40.

Quinone, Action of sulphurous acid on, 13, 33.

Radial vibrations
in cylindrical rods, 153, 601.
in liquids contained in cylindrical tubes, Longitudinal and, (Field), 131.

Radiothermy, 551.

Radio waves and its application to electrotherapy, Selective heating by short, (McLennan and Burton), 550.

Radium therapy, Simple apparatus for purifying radon for use in, 466.

Radon, Simple apparatus for purifying, (Henderson), 466.

Raffinose, Production of dextran from, 426.

Ragwart, Giant, 651.

Raman effect of benzene and toluene under high dispersion and resolving power, (Howlett), 572.

Reaction velocity
The discontinuity in the velocity coefficient of a chemical reaction at the critical temperature, (Sutherland and Maass), 48.

Red Bobs wheat
at low temperatures, Respiration of, 349.
Bunt infection of, 508, 514.

Red Fife wheat, Bunt infection of, 508.

Redfield Yellow sweet clover, 317.

Reflux ratio, 455.

Relationship between endosperm development and morphologic characters in the F_2 generation of a T. dicoccum × T. vulgare cross, (Harrington), 208.

Relative humidity or small temperature differences, Resistance thermometers for the measurement of, (Rose), 156.

Reliance wheat, Bunt infection of, 508, 514.

Renfrew wheat, Bunt infection of, 508.

Resistance of metals, Effect of a magnetic field on, 84.

Resistance thermometers for the measurement of relative humidity or small temperature differences, (Rose), 156.

Resonant frequencies of radial vibration in a cylinder of liquid, 134.

Resorcinol, Action of sulphurous acid on, 13, 34.

Respiration of winter wheat plants at low temperatures, (Newton and Anderson), 337.
Fulcaster, 346.
Marquis, 346.
Minhardi, 346.
Red Bobs, 346.
Squarehead's Master, 346.
Turkey, 346.

Respiration studies, Apparatus used in low temperature, 341.

Retronecic acid, 651.
Di-*p*-phenylphenacyl ester of, 657.

Retronecine, 651.
monolactone, 656.

Retrorsine
Isolation from Senecio retrorsus, 654.
methiodide, 655.

Reward wheat
Bunt infection of, 508.
samples, Comparison of composites and averages,
Grouped on basis of
area of origin, 498.
protein, 497.
Compared with Garnet and and Marquis, 497.

Rhode Island Reds, Agglutination tests in the diagnosis of pullorum disease in, 701.

Rods (ultrasonic method) with special reference to the elasticity of ice, Velocity of longitudinal vibration in, (Boyle and Sproule), 601.
Effect of
dimensional changes, 608.
lateral inertia, 603.
Velocity of sound in cylindrical, (Field), 619.

Ruby wheat, Bunt infection of, 508.

Ruskier wheat, Bunt infection of, 515.

Rust reaction in a cross between two varieties of Triticum vulgare, Effect of temperature on the expression of factors governing, (Harrington), 200.

Saaminkil wheat, 515.

Saccharomyces cerevisiae, Effect of honey bioactivator and Bios upon, 541.

Salinity of the Strait of Georgia, 231.

Salmonella pullorum, 695.

Salt, Effect on precipitation of proteins of plant juice, 102.

Sarcina, 671.

Scintillation method, Measurement of range of α-particles from uranium II by, 567.

Schizosaccharomyces octosporus, 670.

Seed production in sweet clover (Melilotus), Spontaneous self-fertilization in relation to, (Kirk and Stevenson), 660.

Self-fertilization
in relation to seed production in sweet clover, Spontaneous, (Kirk and Stevenson), 660.
in sweet clover, Factors which influence spontaneous, (Kirk and Stevenson), 313.

Senecifolic acid, 653.

Senecifolidine, 652.

Senecifoline, 652.

Senecifolinine, 652.

Senecio species, The alkaloids of, (Manske), 651.
aureus, 651.
burchelli, 651.
jacobaea, 652.
kämpferi, 651.
latifolius, 652.
retrorsus, 652.

Serological, gross and bacteriological findings in agglutination tests in the diagnosis of pullorum disease, 704.

Slip stream of flying aircraft, Humidity measurements in the (Rose), 482.

Sodium chloride, effect on frost precipitation of proteins of plant juice, 102.

Soil, Occurrence and sporulation of Helminthosporium sativum in the, (Henry), 407, 412.

Sound
field in the neighborhood of an oscillating plane disk, (Ruedy), 297.
in cylindrical rods, Velocity of, (Field), 619.
in liquids contained in cylindrical tubes, Transmission of, 138.
in vibrating solid rods, 601.

Specific conductivity
of aqueous solutions of
ammonia, 189.
carbon dioxide, 183.
sulphur dioxide, 171.
of systems containing sulphurous acid, 7.

Sphaeria arceuthobii, 220.

Sphaerulia intermixta, 228.

Spontaneous self-fertilization
in relation to seed production in sweet clover. (Kirk and Stevenson), 660.
in sweet clover (Melilotus), Factors which influence, (Kirk and Stevenson), 313.

Sporulation of Helminthosporium sativum in the soil, Occurrence and, (Henry), 407.
of small additions of unsterilized to sterilized soil, Effect on, 412.

Squarehead's Master wheat at low temperatures, Respiration of, 340, 346, 349.

Stap. aureus, 128.

Strait of Georgia, Epithalassa of; salinity, temperature, pH and phytoplankton, (Hutchinson and Lucas), 231.
Tides in, 233.

Sucrose
as protection against frost precipitation of proteins of plant juice, 87, 95.
Production of dextran from, 421.

Sugar
as a factor in resistance of plants to frost, 327.
concentration on frost precipitation of proteins of plant juice, Effect of, 95.

Sulphite liquors, Specific conductivity and hydrolysis of electrodialyzed, 42.
pulp, Mechanism of sulphonic acid formation in manufacture of, 25.

Sulphonic acids, 1.

Sulphur dioxide solutions
Equilibria existing in, 170.
Partial vapor pressures of, 170.
Specific conductivity of, 171.

Sulphurous acid,
Action on,
Benzaldehyde, 5, 28.
Benzylidene acetone, 9, 31.
Cinnamyl alcohol, 14, 35.
Crotonaldehyde, 26.
Cyclohexanone, 12, 33.
Dibenzyl ketone, 11, 32.
Dibenzoyl methane, 33.
Furfural, 16, 36.
Furfuryl alcohol, 17, 37.
Glucal, 19, 38.
Glucose, 7, 30.
Lignin and related compounds, 1.
Methyl ethyl ketone, 8, 31.
Phloroglucinol, 14, 34.
Quercetin, 22, 40.
Quinone, 13, 33.
Resorcinol, 13, 34.
Tetrahydrobenzene, 14, 35.
Vanillin, 7, 29.

Sulphuryl chloride as a catalyst in preparation of the triacetate of cellulose formed by the action of Acetobacter xylinus on glucose, 584.

Superconductivity, 85.

Supreme wheat, Bunt infection of, 508.

Surface tension of
ethyl acetylene, 311.
methyl acetylene, 311.

Sweet clover (Melilotus)
Factors which influence spontaneous self-fertilization in, (Kirk and Stevenson), 313.
Spontaneous self-fertilization in relation to seed production in, (Kirk and Stevenson), 660.

Temperature
differences, Resistance thermometers for the measurement of small, (Rose), 156.
of gliadin preparations, Viscosity and critical peptization, 394.
of the Strait of Georgia, 231.
on frost precipitation of proteins of plant juice, Effect of, 89.
on the expression of factors governing rust reaction in a cross between two varieties of Triticum vulgare, Effect of, (Harrington), 200.

Tetrahydrobenzene, Action of sulphurous acid on, 14, 35.

Thermometer type of hygrometer for humidity measurements in the slip stream of flying aircraft, Wet and dry bulb mercury, 482.

Thermometers for the measurement of relative humidity or small temperature differences, Resistance, (Rose), 156.

Tides entering Strait of Georgia, 233.

Tilletia levis, Varietal trials, physiologic specialization, and breeding spring wheats for resistance to T. tritici and, (Aamodt), 501.

Tilletia tritici and T. levis, Varietal trials, physiologic specialization, and breeding spring wheats for resistance to, (Aamodt), 501.

Toluene
Comparison of Raman frequencies of benzene and, 575.
Raman spectrogram of, 574.
under high dispersion and resolving power, Raman effect of, (Howlett), 572.
Visual estimates of the intensity distribution in the hydrogen vibrations of benzene and, 577.

Torula sp., 665.

2:3:6-Trimethyl glucose, Preparation of, 590.

Trimethyl-β-3-indolyl-ethylammonium iodide in preparation of N,N-dimethyltryptamine, 595.

2:3:6-Trimethyl methylglucoside, Preparation of, 589.

Triticum
Bunt infection in compactum, dicoccum, durum and vulgare, 512.
double crosses, Bunt infection in, 519, 521.

Triticum vulgare
cross, Relationship between endosperm development and morphologic characters in the F_2 generation of a T. dicoccum ×, (Harrington), 208.
Effect of temperature on the expression of factors governing rust reaction in a cross between two varieties of, (Harrington), 200.

levis, 510.
tritici, 508.

Vanillin, Action of sulphurous acid on, 7, 29.

Vapor density of hydrogen sulphide, (Wright and Maass), 442.

Vapor pressures of
ethyl acetylene, 309.
methyl acetylene, 309.

Velocities of gas reactions, Modified flow method for measuring, (Steacie and Reeve), 448.

Velocity
of longitudinal vibration in solid rods (ultrasonic method) with special reference to the elasticity of ice, (Boyle and Sproule), 601.
of longitudinal waves in cylindrical rods, (Ruedy), 149.
of sound in cylindrical rods, (Field), 619.

Velocity coefficient of a chemical reaction at the critical temperature, Discontinuity in the, (Sutherland and Maass), 48.
of reaction between propylene and hydrogen chloride, 58.

Vernal × Marquis, 209.

Vibrating solid disk
Pressure amplitudes in the sound field of a, 299.
Sound field near a, 297.

Vibration in solid rods (ultrasonic method) with special reference to the elasticity of ice, Velocity of longitudinal, (Boyle and Sproule), 601.
Effect of
dimensional changes, 608.
lateral inertia, 603.

Vibrations in liquids contained in cylindrical tubes, Longitudinal and radial, (Field), 131.

Vibrations in rods
Longitudinal, 149. 601.
Radial, 153. 601.

Viscose, 415.

Viscosity of gliadin preparations, 394.

Vulpes fulvus, 682.

Wallrothiella arceuthobii,
a parasite of the jack-pine mistletoe, (Dowding), 219.
in Canada, Distribution of, 221.

Wheat
Artificial illumination for grading, 64.
Directions for inspectors, 71.
Variation in intensity of light of different colors reflected from various samples of wheat, 74, 76.
Frost precipitation of the proteins in the press-juice of winter, 87.
With and without added sugar, 89.
leaves, Catalase activity of press-juice of winter, 334.
plants at low temperatures, Respiration of winter, (Newton and Anderson), 337.
plants on exposure to frost, Chemical changes in nitrogen fractions of unhardened winter, 327.
Fulcaster, 329.
Minhardi, 329.
Turkey, 329.

Wheat crosses, 200, 208.
Marquillo × Marquis, 200.
Marquis × Emmer (H_{38}), 508.
Marquis × Emmer (H_{44}), 508.
Marquis × Iumillo, 519.
Marquis × Kanred, 519.
T. dicoccum × T. vulgare, 208.

Wheat leaf juice in relation to frost resistance, Catalase activity of, (Newton and Brown), 333.

Wheat stubble in Alberta, Results of attempts to isolate H. sativum from soil and adjacent, 409.

Wheats for resistance to Tilletia tritici and T. levis, Varietal trials, physiologic specialization and breeding spring, (Aamodt), 501.
Loose smut of, 508.

White Leghorns, Agglutination tests in the diagnosis of pullorum disease in, 701.

White Wyandotte females, Agglutination tests in the diagnosis of pullorum disease in, 694.

X-ray examination of cellulose formed by action of Acetobacter xylinus on glucose, 586.

X-rays upon dissociation of tubercle bacilli. Influence of, (Rice and Reed), 122.

Xylose, Production of dextran from, 426.

Yeasts
Accessory food substances for osmophilic,
I. A bioactivator in honey stimulating fermentation, (Lochhead and Farrell), 529.
II. Comparison of honey bioactivator with Bios, (Farrell and Lochhead), 539.
found in normal honey and their relation to fermentation, Types of osmophilic, (Lochhead and Farrell), 665.

Young's modulus, Comparison of velocities of longitudinal vibration in metal rods obtained by the ultrasonic method with those computed from values of, 610.
for ice, 613.

Zinc chloride-hydrochloric acid, Hydrolysis of cellulose formed by action of Acetobacter xylinus on glucose with, 587.

Zouave sweet clover, 317.

Zygosaccharomyces, 529, 539, 665.
barkeri, 670.
japonicus, 669.
mellis, 531.
Effect of honey bioactivator and Bios upon, 542.
nadsonii, 670.
nussbaumeri, 668.
priorianus, 669.
richteri, 667.

ERRATUM

Page 587, caption of Fig. 1, for "hydrochloride", read "hydrochloric".
